

STEP 1 - Select a Frame Width

Retractable Frame Sizes / Projections

10' x 8' : 12' x 10' : 16' x 10' : 20' x 10'
16' x 12' 20' x 12'

All motorized

Choose from 6 awnings sizes from a 10' x 8' - projection for the smaller areas up to 10' projection awnings available in 12', 16' and 20' widths.

STEP 2 - Select a Frame Color

Marygrove offers three popular frame colors that will match or accentuate any home.

BEIGE

WHITE

BRONZE

We've done the research on creating just the right white, beige and bronze colors for exterior use. Combine these with the 9 fabric selections for a large variety of choices.

The Most Standard Features In The Industry

Adjustable Pitch

Easily Adjusted With The Turn Of A Crank

Adjustable Pitch feature allows you to easily raise and lower the pitch of the awning to better defend against the sun. Use Hand Crank provided to easily turn the adjustable pitch pin for pitch adjustment. Another way Marygrove is revolutionizing the awning industry!

Integrated Cover Housing

Integrated protective aluminum housing provides greater longevity of fabric.

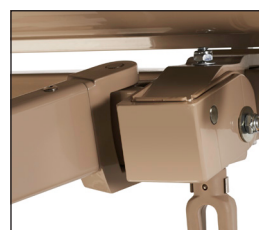

Motor & Remote

Retracts At The Click of A Button

Right side mounted tubular AC motor (protected from the elements), with manual override, and remote control. The included 16' power cord reaches most electrical outlets with no need to call an electrician. All motors come with a manual override in case of power failure.

Strength/Durability

Shoulder attachments are extruded Aluminum for added strength and durability.

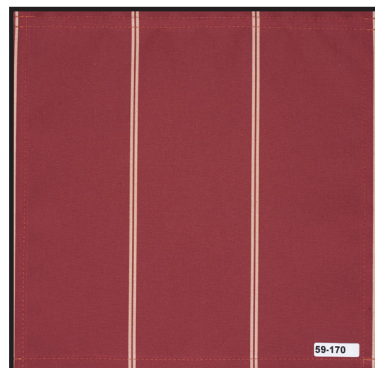

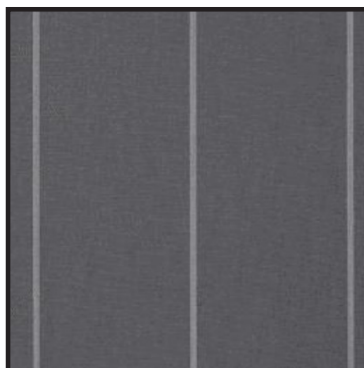

Double high quality aircraft cables. Double cables help in preventing fabric sagging and creates premium fabric tension.

Fabrics

STEP 3 - Select a Fabric Color

10 STOCK FABRIC COLOR CHOICES - IN WHITE / BEIGE / BRONZE FRAMES

Carrot vs. Radish

Marygrove's rich fabric color is achieved by it's coloring process. Color is applied throughout the yarn. This keeps Marygrove fabric from fading and losing it's color.

Unlike some of our competitors, Marygrove does not use a surface color application, where color is only applied to the surface of the yarn.

Unsurpassed **Design**

"Sleek curves, user-driven design, and designed for performance could describe a top-of-the-line sports car – but we use these terms to describe the design of our awnings."

Industry - Leading **Quality**

Every Marygrove retractable awning is made with industry-leading quality in mind. You'll enjoy these high-quality retractable awnings for many trouble-free years. Take a few moments to explore the design, fabric, features, and accessories which have helped Marygrove Awnings revolutionize the awning industry.

Mounting Accessories

Standard Mount: Powder coated extruded steel wall mount bracket.
Vinyl Siding Mount Plate: Plastic shim that is designed to fit the contours of the siding of your home and provide a flatbed for the wall mount bracket to be placed against. Ideal for "double four" siding.

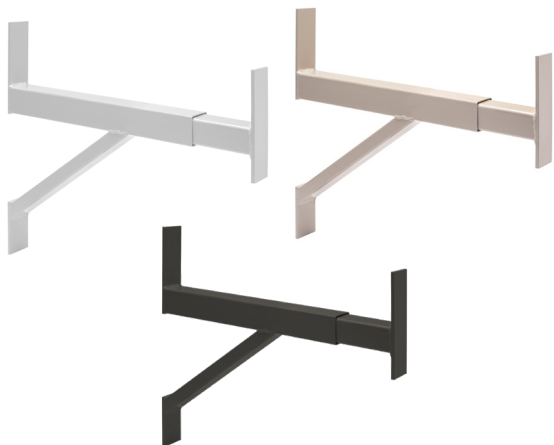

Roof Mount Brackets: Powder coated extruded aluminum three part bracket that is mounted to the roof joists and sealed to the roof deck providing a wall like area to attach the wall bracket to. These are ideal for an area where height is an issue.

Bay Mount Brackets:

install around a bay door,
window or chimney with
these brackets.

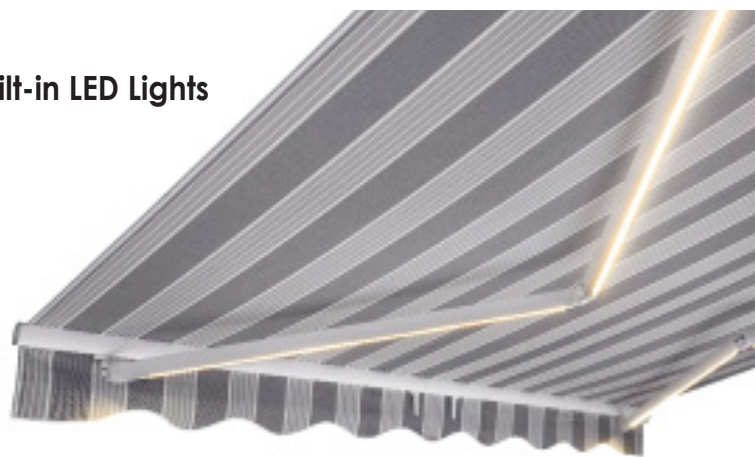

*All Brackets match frame
color of awning*

Built-in LED Lights

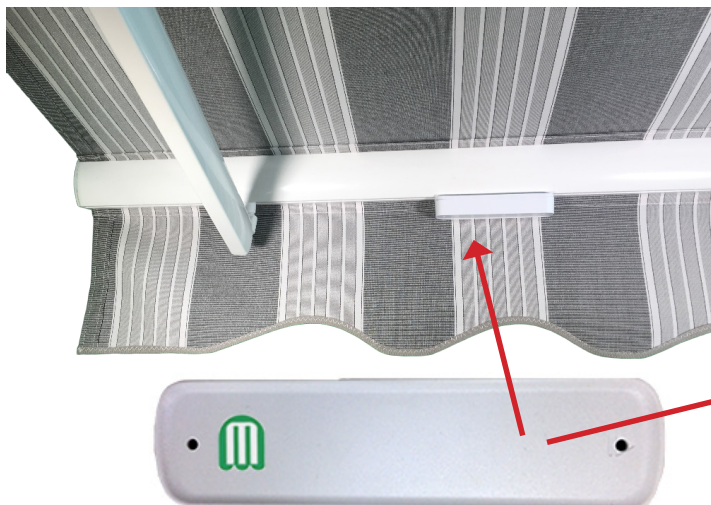

Accessories

Front Screen

For applications that face east or west you can extend the use of your awning by adding Marygrove Awnings front screen. The screen simply extends when needed and retracts when you want to maintain all of your uninterrupted view.

Wind Sensor

The Marygrove Wireless Wind Sensor is specifically designed for all Marygrove Retractable Awnings. This accessory will give you peace of mind if you are concerned about your awning in windy conditions. The sensor continually monitors the strength of the wind and based on the sensitivity setting that is set, will automatically retract the awning. The awning will stay closed until you choose to open it again.
